Money doesn't grow on trees. But that doesn't mean you don't have options. Advantage Leasing Corporation is still lending – offering competitive, flexible lease programs for most any kind of business equipment – including manufacturing, office equipment, material handling, medical, computers, and software.

While most equipment leasing companies are simply brokers that sell your lease or business loans to national funding sources, **we use our own strong capital base to lend directly to your customers.** We structure a lease specifically to meet your customer's needs and desires with greater flexibility throughout the term of the lease – and no broker fees!

Since 1992, Advantage Leasing Corporation has built thousands of successful long-term relationships with businesses, manufacturers, franchise companies, distributors and dealers throughout the United States.

We believe small business is what makes our country go and take pride in helping other businesses succeed with our small business loans. Try us out and you can see why our current vendor partners enjoy working with Advantage.

We're Still Lending.
